Douglas C. McMurtrie, New York

BIBLIOGRAPHY OF FUSED SILICA

The behaviour of fused silica at high temperatures. A. BLACKIE. *Transactions of the Faraday Society*, 7: 158–165. [1911]

Über die absolute Ausdehnung des Quarzglases bis zur Temperatur des flüssigen Wasserstoffs. (Absolute expansion of fused quartz down to the temperature of liquid hydrogen.) KARL SCHEEL and WILHELM HEUSE. *Verhandlungen der deutschenPhysikalischen Gesellschaft*, 16:1-3. [1914]

Bestimmung von Ausdehnungskoeffizienten bei tiefen Temperaturen. (Determination of the coefficient of expansion at low temperatures.) S. VALENTINER and T. WALLOT. *Verhandlungen der deutschen Physikalischen Gesellschaft*, 16: 757–764. [1914]

On the expansion of vitreous silica. H. L. CALLENDAR. *Proceedings of the Physical Society of London*, 24: 195–200. [1912]

305668

The expansion and thermal hysteresis of fused silica. G. W. C. KAYE. *Philosophical Magazine*, 6 ser., 20: 718–728. [1910]

The expansion of mercury and of quartz. N. EUMORFOPOULOS. *Philosophical Magazine*, 23: 653–655. [1912]

Anisotropic expansion of a drawn tube of vitreous silica. H. L. CALLENDAR. *Philosophical Magazine*, 6 ser., 23: 998–1000. [1912]

The cubical expansion of fused silica . . . . F. J. HARLOW. *Proceedings of the Physical Society of London*, 24: 30–39. [1911]

The coefficients of expansion of fused silica and mercury. H. DONALDSON. *Proceedings of the Physical Society of London*, 24: 186–194. [1912]

Über thermische Ausdehnung in tiefer Temperatur. (Thermal expansion at low temperatures.) KARL SCHEEL. *Physikalische Zeitschrift*, 8: 755. [1907]

On the coefficient of expansion of fused

quartz. HOWARD D. MINCHIN. *Physical Review*, 24: 1–21. [1907]

La compressibilité des recipients en verre de quartz et les constantes élastiques du quartz fondu. (The compressibility of quartz vessels and the elastic constants of quartz.) A. SCHIDLOF and MME. ALFTHAN-KLOTZ. *Archives des Sciences Physiques et Naturelles*, 27: 487–516. [1909]

A silica standard of length. G. W. C. KAYE. *Proceedings Royal Society of London*, 85-A: 430–447. [1911]

Silica standards of length. *Metallurgical and Chemical Engineering*, 8: 257. [1910]

Quarzgläser. (Quartz glasses.) H. SEGER and E. CRAMER. *Chemiker-Zeitung*, 37: 206. [1913]

Zur Frage der Entglasung von Quarzglas. (Devitrification of quartz glass.) A. C. MICHIE. *Chemiker-Zeitung*, 37: 589–590. [1913]

On the devitrification of silica glass.

SIR WILLIAM CROOKES. *Chemical News*, 105: 205. [1912]

The insulating properties of solid dielectrics. HARVEY L. CURTIS. *Journal of the Washington Academy of Sciences*, 4: 492–494. [1914]

Über die Leitfahigkeit einiger Isolatoren bei hohen Temperaturen. (Conductivity of certain insulators at high temperatures.) MARCELLO VON PIRANI and WERNER VON SIEMENS. *Zeitschrift für Elektrochemie*, 15: 969–973. [1909]

Note on the resistivities of glass and fused silica at high temperatures. ALBERT CAMPBELL. *Proceedings of the Physical Society of London*, 25: 336–337. [1913]

Vacuum-tight lead-seals for leading-in wires in vitreous silica and other glasses. HENRY J. S. SAND. *Proceedings of the Physical Society of London*, 26: 127–130. [1914]

Additional refractive indices of quartz vitreous silica, calcite, and fluorite. J.

W. GIFFORD. *Chemical News*, 102: 181. [1910]

Sur la préparation de l'hélium pur par filtration des gaz de la clévéite à travers une paroi de silice. (The preparation of pure helium by filtering the gas from clevite through a quartz partition.) ADRIEN JAQUEROD and F.-LOUIS PERROT. *Comptes Rendus*, 144: 135–136. [1907]

Sur une remarquable condition de l'attaque du quartz par l'acide fluorhydrique gazeux. (On a remarkable condition of attack on quartz by hydrofluoric acid gas.) ARMAND GAUTIER and P. CLAUSMANN. *Comptes Rendus*, 157: 176–179. [1913]

The action of sugar solutions on glass. J. N. LAIRD. *Journal of Pathology and Bacteriology*, 18: 32. [1913]

Eine neue Bestimmung des Stomgewichtes des Selens. (A new determination of the atomic weight of selenium.) JOSEF JANNEK and JULIUS MEYER. *Zeitschrift für anorganische Chemie*, 83: 51–96. [1913]

The molecular weight of sodium carbonate and the atomic weight of carbon referred to silver and bromine. THEODORE W. RICHARDS and CHARLES R. HOOVER. *Journal of the American Chemical Society*, 37: 95–107. [1915]

A new method for the precise standardization of hydrochloric acid solutions. LAUNCELOT W. ANDREWS. *Journal of the American Chemical Society*, 36: 2089–2091. [1914]

Methoden der Wasserdestillation. (Methods of water distillation.) A. G. BARLADEAN. *Muenchener Medizinische Wochenschrift*, 60: 1601–1603. [1913]

Electroanalysis. *Report British Association for the Advancement of Science*, 1911, p. 98-99.

Note on blowing fine quartz fibers. WILLIAM W. COBLENTZ. Carnegie Institution of Washington, *Publication No. 65*. Appendix 5. [1906]

Marking porcelain and silica crucibles, etc. P. A. YODER. United States Department of Agriculture, Bureau of Chemistry. *Circular No. 93*. [1912]

A new apparatus for the coking test of coal. R. LESSING. *Journal of the Society of Chemical Industry*, 31: 465–468. [1912]

An electric combustion furnace, laboratory treating furnace and rheostat. GEORGE M. BERRY. *Journal of Industrial and Engineering Chemistry*, 2: 255–260. [1910]

Electric combustion furnace. JOHN K. POLK. *Chemist-Analyst*, No. 6, p. 4-7. [1912]

Sur l'emploi de résistances de chrome métallique granulaire pour le chauffage électrique. (Furnace with chromium resistance, for electric heating.) O. DONY-HENAULT. *Comptes Rendus*, 156: 66–68. [1913]

Determination of carbon in iron and steel. MAX R. TREMBOUR. *Chemical Engineer*, 11: 85. [1910]

The determination of carbon in steel, ferro-alloys, and plumbago by means of an electric combustion furnace. C. M. JOHNSON. *Journal of the American Chemical Society*, 30: 773–779. [1908]

Determination of carbon in steel by the direct combustion method. WILLIAM BRADY. *Journal of Industrial and Engineering Chemistry*, 6: 843–845. [1914]

Die Bestimmung des Kohlenstoffs im Eisen, Graphit und Wolframmetal durch Verbrennung. (Determination of carbon in iron, graphite and tungsten by combustion.) M. DENNSTEDT and TH. KLÜNDER. *Chemiker-Zeitung*, 34: 485–486. [1910]

Kohlenstoff Bestimmung im Stahl mittels Allihnscher Filtrierrohre. (Determination of carbon in steel with the Allihn filter tube.) PRETTNER. *Chemiker-Zeitung*, 34: 578–579. [1910]

Methods of the United States Steel Corporation for the commercial sampling and analysis of pig iron. CHEMISTS' COMMITTEE OF THE UNITED STATES STEEL CORPORATION. *Journal of Industrial and Engineering Chemistry*, 4: 801–812. [1912]

An application of the electric resistance furnace to the determination of oxygen in iron and steel. R. H. McMIL-

LEN. *Metallurgical and Chemical Engineering*, 11: 86–87. [1913]

Einige Erfahrungen aus der Laboratoriumspraxis über Eisen- und Aluminiumsbestimmungen. (Some experiences in laboratory practice on iron and aluminum determinations.) HERMANN BORCK. *Zeitschrift für angewandte Chemie*, 25: 719–720. [1912]

Determination of oxygen in copper and brass. T. WEST. *Institute Metals preprint*, Aug., 1913.

Electric combustion furnace for methane determination. J. A. FRIES. *Journal of the American Chemical Society*, 32: 949–953. [1910]

The estimation of halogens in organic compounds, including a device for the combustion of volatile substances. E. EMMET REID. *Journal of the American Chemical Society*, 34: 1033–1039. [1912]

Notes on the electrical method of Morse and Gray for the simultaneous determination of carbon, hydrogen and sulphur in organic compounds. E.

EMMET REID. *American Chemical Journal*, 47: 416–429. [1912]

Determination of hydrogen, nitrogen and methane in gas by combustion in a quartz tube. MATHERS and LEE. *Chemical Engineer*, 17: 159–162. [1913]

A rapid method for the determination of sulphur in roasted blende. C. C. NITCHIE. *Journal of Industrial and Engineering Chemistry*, 4: 30–32. [1912]

Rapid determination of sulphur in pyrites cinder. A. B. CONNER. *Journal of Industrial and Engineering Chemistry*, 5: 399–401. [1913]

Estimation of carbon. A. MACARTHUR JOHNSTON. *Journal of the Chemical, Metallurgical and Mining Society of South Africa*, 12: 505. [1912]

A modification of the Jäger method of gas analysis. S. H. WORRELL. *Metallurgical and Chemical Engineering*, 11-245–247. [1913]

Note on a perforated silica plate for excluding flame gases from a crucible during ignition. ALEXANDER CHARLES

CUMMING. *Proceedings of the Royal Society of Edinburgh*, 32: 17–18. [1911]

Ersatz der Platincapillare bei der Kohlenstoffbestimmung in Eisen usw. nach dem Chromschwefelsäure-Verfahren. (A substitute for a platinum capillary in the determination of carbon in iron by the chromic acid method.) M. WIDEMANN. *Chemiker-Zeitung*, 33: 1186. [1909]

A support for laboratory crucibles, basins, etc. GEORGE T. HOLLOWAY. *British Patent 12,787*. [1907]

Platinum resistance furnace for melting points and combustions. SAMUEL A. TUCKER. *Journal of the American Chemical Society*, 29: 1442–1444. [1907]

Sur l'aimantation de l'eau et de l'oxygène. (Magnetization of water and oxygen.) PIERRE WEISS and AUGUSTE PICCARD. *Comptes Rendus*, 155: 1234–1237. [1912]

Tests to determine the commercial value of wood preservatives. A progress report. HOWARD F. WEISS. *Proceedings*

Eighth International Congress of Applied Chemistry, 13: 279–300. [1912]

Über die Entwicklung der analytischen Chemie. (On the development of analytical chemistry.) E. WILKE. *Zeitschrift für Elektrochemie*, 17: 623–629. [1911]

A precision viscosimeter for measurement of relative viscosities. . . . . EDWARD W. WASHBURN and GUY Y. WILLIAMS. *Journal of the American Chemical Society*, 35: 737–750. [1913]

Fused silica ware. J. FRANK BOTTOMLEY. *Proceedings Seventh International Congress of Applied Chemistry*, 2: 181–183. [1909]

Fused quartz and quartz glass. CHARLES COLNE. *Metallurgical and Chemical Engineering*, 9: 226–228. [1911]

Fused silica ware. *Chemical Trade Journal*, 46: 61. [1910]

Pure fused silica ware. *Chemical Trade Journal*, 52: 104. [1913]

Silica ware products. *Chemiker-Zeitung Repertorium*, 35: 286. [1911]

FUSED SILICA

Das Lötrohr aus Glas. (Glass blow pipe with quartz tip.) LUD. KOPA. *Chemiker-Zeitung*, 37: 534. [1913]

Ersatzmaterial für Platin. (A substitute for platinum.) *Chemiker-Zeitung*, 37: 754. [1913]

A silica-jacketed silica polarimeter tube. T. MARTIN LOWRY. *Transactions of the Faraday Society*, 9: 193. [1913]

UNIVERSITY OF CALIFORNIA LIBRARY,
BERKELEY

THIS BOOK IS DUE ON THE LAST DATE
STAMPED BELOW

Books not returned on time are subject to a fine of 50c per volume after the third day overdue, increasing to $1.00 per volume after the sixth day. Books not in demand may be renewed if application is made before expiration of loan period.
